

# Are blemishes and bumps hurting your customer loyalty? **VIBCO will smooth things over.**

We're the **CONCRETE** Vibrator Guys.™

## Product Application Bulletin #458 Model 42-2 Wedge Head Piston Vibrator

### VIBCO'S SOLUTION

The customer mounted several VIBCO wedge brackets to their forms and then used a VIBCO 42-2 Wedge Head Piston Vibrator. The vibrator was easily moved around the form and set into each bracket to provide uniform vibration. The vibration released the trapped air, which strengthened the concrete and provided a much smoother finish. The higher quality impressed customers and led to increased sales.

### VIBCO'S BENEFITS

After installing the VIBCO 42-2 Wedge Head Piston Vibrator and wedge bracket system the customer received the following benefits:

- Stronger product with a smooth, blemish-free finish
- Affordable, efficient solution
- Superior quality product led to increased sales

## CONCRETE FORM VIBRATORS

“Customers weren't happy with the quality of our concrete...

Air bubbles were getting trapped in the concrete in our burial vault, septic tank, and box culvert forms. It was weakening the concrete and causing unsightly bumps and blemishes to appear in the finish. I called our dealer to ask which vibrators would fit our forms and he recommended we try VIBCO's 42-2 Wedge Head Piston Vibrators. They were very affordable, and have absolutely solved our quality problem. The wedge-style design and bracket system makes them really easy to move between forms. Our customers really like how smooth our products are now. We'll definitely be buying more VIBCO Vibrators!”

Precast Owner  
James W., Maryland
