

Do your customers expect high quality concrete products? **Exceed their expectations with VIBCO.**

We're the ^{CONCRETE} Vibrator Guys.™

Product Application Bulletin #468 Model CCL-5000 Silent Pneumatic Turbine Vibrator

VIBCO'S SOLUTION

A VIBCO CCL-5000 Silent Pneumatic Turbine Vibrator was mounted to the concrete form. The vibration released the trapped air, creating a smooth, blemish-free finish that required no hand-finishing. The vibration also properly consolidated the concrete so it is much stronger and more appealing to customers.

VIBCO'S BENEFITS

After installing the VIBCO CCL-5000 Silent Pneumatic Turbine Vibrator the customer received the following benefits:

- Increased production rate by eliminating the need to hand-finish product
- Increased product quality and strength
- Increased customer satisfaction and demand for product

CCL-5000

CONCRETE FORM VIBRATORS

"Our product quality was suffering..."

Our concrete was honeycombing because of trapped air and poor consolidation, and the structure was weak. That combination is definitely not good for business. We identified some issues with our mix, but even after solving those problems and wasting a lot of time hand-finishing, we still couldn't get the quality that our customers wanted. We talked to a local equipment dealer, and he recommended that we do a 10-day free trial of a VIBCO Vibrator to see if it would work for us. So we agreed to try the VIBCO CCL-5000 turbine vibrator. It worked so well we decided to buy it after the very first pour! "

Production Manager
Wes R., Georgia

Model CCL-5000 Silent Pneumatic Turbine Vibrator

- 6,000 VPM at 80 PSI
- 5,000 lbs of force
- 50 CFM at 80 PSI
- 78 dB on A-Scale at 1 meter
