

If only everything in your operation had this kind of flow...
Take a load off with VIBCO.

We're the **SILENT** Vibrator Guys.™

**Product Application
Bulletin #465
Model HF-3500
"Big Buster"
Hydraulic Vibrator**

VIBCO'S SOLUTION

Because this customer already had an existing hydraulic line set up on the mobile unloader, VIBCO engineers recommended the VIBCO HF-3500 "Big Buster" Hydraulic Vibrator. The vibrator was attached to the side of the hopper and 25 ft. lines were used to connect it to the hydraulic power supply. They have now increased the overall efficiency of their process.

VIBCO'S BENEFITS

After installing the VIBCO HF-3500 Hydraulic Vibrator the customer received the following benefits:

- Increased production rate and material flow
- Increased breadth and depth of product offerings
- Increased profitability by increasing efficiency

HF-3500

RAILROAD CAR SHAKER

"We needed to increase our efficiency...

We were really happy with the performance of our mobile unloader, but we weren't maximizing it's use. We were having a lot of trouble getting material through the railcar hopper. Anything that wasn't perfectly dry and fluffy wouldn't flow well, so we ended up bringing a lot of material in by truck. We wanted to increase the amount and types of materials unloaded via railcar, so that we could expand our product line. We called up our equipment dealer for a solution and he recommended that we try one of VIBCO's hydraulic railcar shakers. It works great!"
