FEEDER TUBES

PRODUCT APPLICATION BULLETIN

Model US-450 High Frequency Electric Vibrator

Technical Specifications

- 9000 Max Speed at 1 Phase
- 450 lbs. of force
- 115 AC-DC Volts
- 80 dB on A-Scale at 1 meter
- Intermittent Cycle

PROBLEM

A company created a system designed to feed computer chips to and from storage tubes into trays for testing. Unfortunately, the chips would not slide easily into the trays or back into the tubes. The company was very disappointed that they had spent so much time and money on this new design that was not working. Not to mention the fact that it compromised their production rate.

SOLUTION

After installing VIBCO's Model US-450 High Frequency Electric Vibrator, their parts flow problem was solved. The time and money they spent on the design of the feed system was not lost and their production rate increased greatly.

BENEFITS

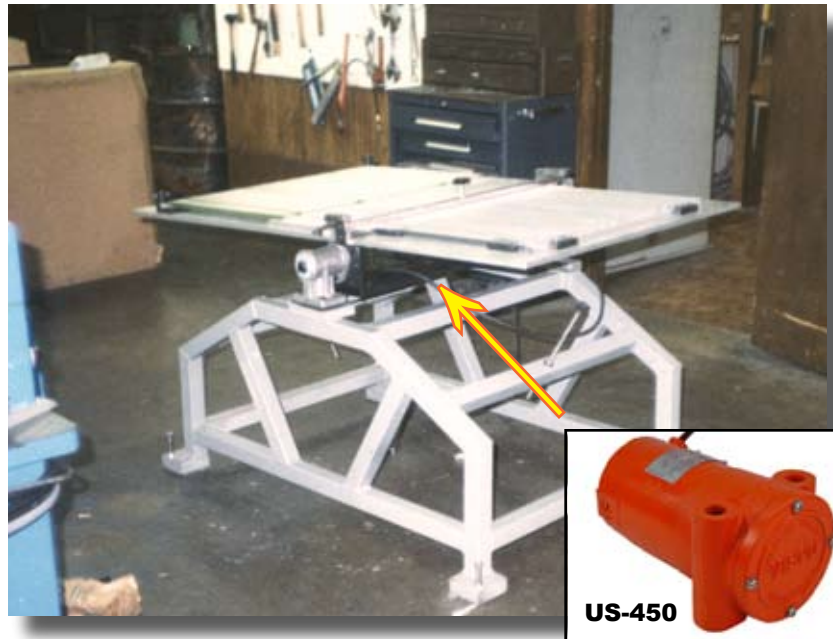

After installing the VIBCO Model US-450 High Frequency Electric Vibrator the customer received the following benefits:

- Their feeder design works properly
- Increased production flow
- Did not lose time or money, they gained it

These Also Work:

- Model VS-250 Silent Pneumatic Turbine Vibrator
- Model SCR-400 Adjustable Speed & Force Electric Vibrator
